## Requisition 1119/1 and 1119/2 1943

As with the 1089/1 requisition 1119/1 was for a reprint of the 1/2d and 11/2d. And, as before, there were two despatch dates, 18th January and 22nd January. These stamps were very urgently required and were not to be interleaved with wax. The 11/2d had priority and was to be delivered in advance. Following on from this Part 2 of the order was a reprint of all the other values. They were required for dealers and delivered to A2 on 27th August 1943. Although the entry seems to show that the whole printing went into the Bureau, some 10% would have been sent to the territory. No date of despatch was given.

## Requisition 1146/2 1943

This was the reprint of two values, the 2d and 6d. Again there were two despatch dates, 6th and 12th of October. However if we look at the notes for the 1944 Requisition 1194/2 it may be assumed that most of this printing went into the Bureau's stocks.

Value	Req No.	Despatched	Quantity	Specs/CA	Total
2d	1146.2	6/10/43	634200		634200

## Requisition 1194/2 1944

Just one stamp, the 2d despatched on two dates, 11th and 24th August. The former was the balance of the Bureau's stocks of previous printing posted 27th October 1944. Logically this release would be the stamps from the previous 1943 (1146/2) printing. The words of 'previous printing' indicates that the general rule, where under CA exchanged new stocks for old, may not have been followed here.

Value	Req No.	Despatched	Quantity	Specs/CA	Total
2d	1194.2	11/8/44	606000		606000
2d	1194.2	24/8/44			

## Requisition 1254/1 1945

Major Criddle poses a question about this requisition. He states that the notes say that A2's stocks were 49,000 (3.9.45).

"In the light of the 1163 Requisition notes how did A2 have this quantity? They must have retained an unspecified quantity of 1146/2 until 27th October 1944."

Interleaving was not required.

## Requisition 1299/2 1946
